

# TOGAF®

TOGAF®, an Open Group standard, is the open Enterprise Architecture standard used by the world's leading organizations to improve business efficiency. The Open Group TOGAF Certification Program has enabled more than 47,000 Enterprise Architects and trainers around the globe to demonstrate their proven knowledge of the framework.

Certification is achieved through a two-part exam, following a course of self-study or attendance at an Accredited Training Course. The current syllabus for all accredited courses is based on the TOGAF 9.1 Standard since December 2011.
